

REPORTING THAT CREATES INSIGHTS AND ACTIONS

Improving educational outcomes starts with data. Not the limited view of data trapped in individual vendor silos, but robust, integrated data. However, data by itself does not provide value. Schools and districts must be equipped to create insights and take action at every level and role in the organization.

IO Insights is the most compelling answer to this challenge; easily aggregating student data from all of your source systems and creating insights from easy-to-use dashboards, goal based reporting and virtual data walls that your entire staff will want to use.

IO Insights helps all educators to make data-driven insights and actions

DISTRICT

Custom dashboards with drilldown reporting without the expense of the big BI vendors

- Customized reporting views for any district needs
- All-in-one dashboard for each user to quickly view their favorite analysis
- Advance graphs using plotted, trend and comparison charts
- Convenient drill down reporting to underlying data
- Cost effective solution compared to large BI vendors

SCHOOL

Define goals and measure progress for school and district metrics

- Set school or classroom goals and identify metrics to track progress
- Customizable landing page shows reports most important to each user
- Track multiple pathways for graduation based on school, district and state requirements
- Customizable Early Warning Indicator system to identify students based on custom metrics
- Easy comparison reporting across classrooms and schools

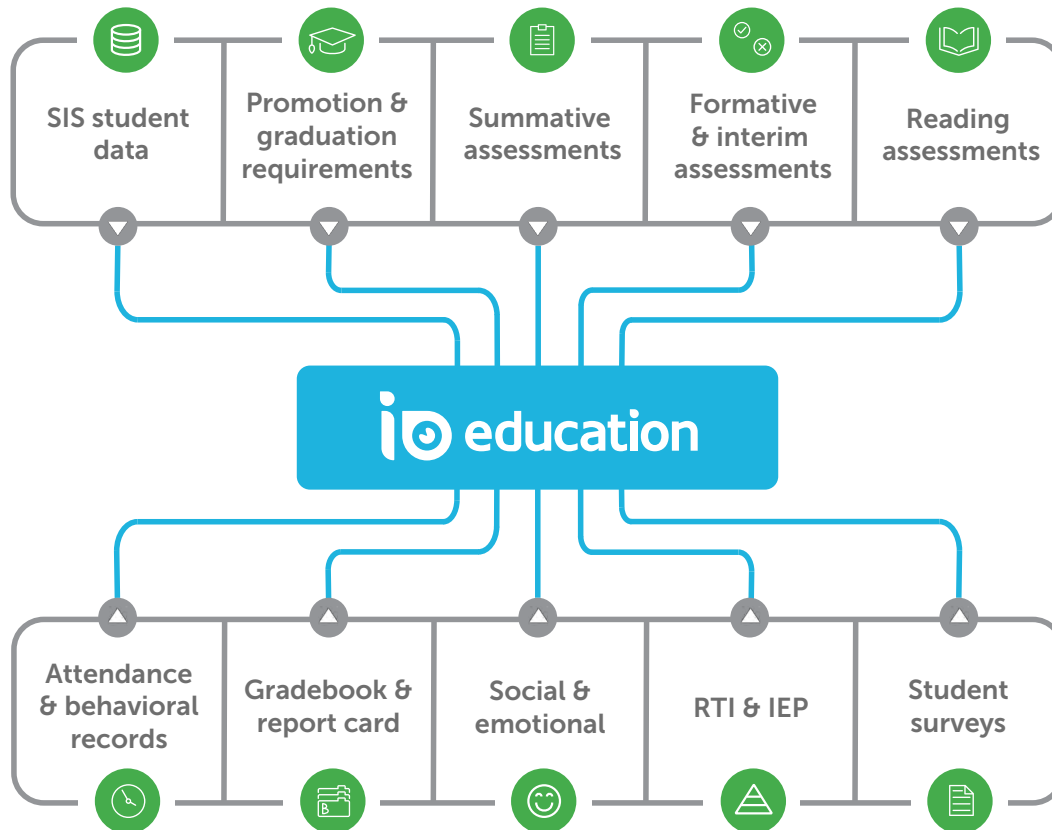

CLASSROOM

Real-time student data analysis for teachers and PLCs using simple grouping, sorting and filtering

- Virtual data wall replaces static data walls to identify student needs and progress
- Friendly data visualization of student data using easy sorting, grouping & filtering
- Save favorite views for easy access
- Share views among other educators for regular collaboration
- Detailed student profiles with all aggregated data and interventions in one place

IO Insights provides the right data for the right people at the right time.

IO Education breaks down the data silos across your district by aggregating data from your existing systems. IO Education has built a suite of enterprise-grade. Connectors to consolidate data from even the most remote sources.

**MOVE BEYOND STATIC DASHBOARDS THAT REQUIRE DATA SPECIALISTS,
AND EMPOWER YOUR WHOLE ORGANIZATION TO USE DATA
TO IMPROVE EDUCATIONAL OUTCOMES**
