

IO ASSESSMENT: PROVIDING EDUCATORS WITH SHORT CYCLE ASSESSMENT TOOLS & READY TO USE REPORTING

SHORT CYCLE ASSESSMENTS

IO Assessment enables teachers to quickly create, score and store, and analyze standards-aligned answer sheets for exams.

IO Assessment allows teachers to easily create or use saved answer sheets, align questions to local or Common Core standards, scan and score bubbled responses, and store both the exams and responses. The dashboard reporting helps teachers assess which teaching methods are successful for the class, as well as identifying the needs of individual students based on specific standards.

IO Assessment is the best way to add time back into your teacher's day while improving your standards-aligned assessment capabilities.

SHORT CYCLE ASSESSMENT MADE EASY

Easily create plain paper, scannable exams and align questions to state standards. Use low-cost multifunction scanners to instantly score your assessments online.

Include any combination of multiple choice and constructed response questions. Score constructed response items using your district's rubrics.

Disaggregate test scores by teacher, grade-level, school, district, ethnicity, gender, language fluency, program participation, tribal affiliation, etc.

Compare your formative data to your students' state assessment data, over time, using our web-based longitudinal data warehouse.
