

## IO PLANS: THE INTEGRATED SOLUTION FOR PERSONALIZING LEARNING

IO Plans is the personalized learning planning and management module that helps improve student achievement. IO Plans is tightly integrated to IO Insights module that provides robust, real-time student data needed by teachers to plan and manage personalized instruction.

With IO Plans, educators can easily develop personalized learning plans for a single student or many cohorts of students for each class or grade. And once the plans have been created, the real-time integration with IO Insights allows teachers to monitor and manage the student achievement of the plans and make adjustments as needed.

With IO Plans, educators are empowered to make data-driven personalized learning plans:

- Real-time integration with student data IO Insights
- Baseline student performance
- Monitor and analyze success of intervention strategies in real-time
- Design and Implement personalized learning plans
- Evidence-based portfolio aligned to standards
- Identify learning support needs
- Support Tier 1, 2 and 3 Response to Intervention (RTI) plans
- Develop plans for advanced and gifted students
- Complete student profile
- Collaborate with other educators on student learning plans
- Integrated with PupilPath student and parent portal

IO Plans is your solution for personalized learning plans and management in every classroom in your district.
